INT. COMM. HEAT MASS TRANSFER 0735-1933/87 $3.00 + .00
Vol. 14, pp. 753-760, 1987 ©Pergamon Journals Ltd. Printed in the United States

# INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

## LIST OF CONTENTS FOR VOLUME 14, 1987

1987 Volume 14, Number 1 January–February

Contents

| | | |
|---|---|---|
| | 1 | Luikov Medal Awards 1986 |
| M. Kazmierczak and D. Poulikakos | 3 | An optical technique for the in-situ measurement of species concentration in double diffusive convection |
| N.T. Obot, E.B. Esen and K. Adu-Wusu | 11 | Pressure drop for rib-roughened scalene triangular duct having two rounded corners |
| W.E. Stewart, Jr. and K.L. Smith | 21 | Experimental inward solidification of initially superheated water in a cylinder |
| P.K. Panday | 33 | Laminar film condensation of downward flowing vapour on a horizontal elliptic cylinder – a numerical solution |
| D. Moalem Maron and N. Brauner | 45 | The role of interfacial mobility in determining the interfacial shear factor in two-phase wavy film flow |
| K-L Wong and C-K Chen | 57 | Finite element solution for laminar flow and heat transfer past a short circular cylinder |
| H.Th. Jakobsson and A.J. Ghajar | 67 | Numerical solutions of heat conduction and simple fluid flow problems |
| R.H. Mascheroni, P.D. Sanz and M. Dominguez | 81 | A new way to predict thermal histories in multidimensional heat conduction: the z-transfer function method |
| C.J. Ho and Y.L. Yih | 91 | Conjugate natural convection heat transfer in an air-filled rectangular cavity |
| N.S. Grewal, M.M. Sadeghi, V.K. Nangia and S.S. Rao | 101 | Normal total emittance of quartz |
| EDITORIAL | I | Software Survey Section |

1987 Volume 14, Number 2 March–April

Contents

| | | |
|---|---|---|
| A. Bejan | 107 | The basic scales of natural convection heat and mass transfer in fluids and fluid-saturated porous media |
| C.Y. Liu, C.Y. Lam and A.C. Guerra | 125 | Free convection near a corner formed by two vertical plates embedded in porous medium |
| P.N. Shivakumar, N. Rudraiah, D. Pal and P.G. Siddheshwar | 137 | Closed form solution for unsteady convective diffusion in a fluid-saturated sparsely packed porous medium |
| J.J. Jou and J.S. Liaw | 147 | Transient thermal convection in a rotating porous medium confined between two rigid boundaries |
| Ph. Riviere and H. Beer | 155 | Experimental investigation of melting of unfixed ice in an isothermal horizontal cylinder |
| M.M. Sorour, M.A. Hassab, M.B. Madi and F.T. Kandil | 167 | Formation and melting of a vertical ice slab in an enclosure |
| V. Subramaniam, V. Chandrashekar, D.S. Karanth and S. Jayaram | 179 | Experiments on a weakly deflected jet |
| W.M. Yan and T.F. Lin | 187 | Natural convection heat transfer in vertical open channel flows with discrete heating |
| V.D. Murty | 201 | A study of the effect of aspect ratio on Benard convection |
| C.Y. Wang | 211 | Generation of steady flow by an oscillatory acceleration and an oscillatory wall temperature |
| D.A. Tarzia | 219 | Determination of unknown thermal coefficients of a semi-infinite material for the one-phase Lame-Clapeyron (Stefan) problem through the Solomon-Wilson-Alexiades' mushy zone model |
| F.A. Ansari | 229 | A simple and accurate method of measuring surface film conductance for spherical bodies |
| EDITORIAL | I | Software Survey Section |

1987 Volume 14, Number 3 May–June

Contents

H.K. Yoon and A.J. Ghajar — 237 Heat eddy diffusivity for viscoelastic turbulent pipe flows

G.B. Reddy and J.C. Mulligan — 251 Macroscopic continuum analysis of simultaneous heat and mass transfer in unsaturated porous materials containing a heat source

W.-J. Yang, G. Kawashima, P.P.-T. Yang and J. Lin — 265 Natural convection in evaporating sessile drops with crystal growth

K.A. Kroos — 281 Thermistor thermometry errors induced by forced convection

N. Brauner, D. Moalem Maron and I. Toovey — 293 Characterization of the interfacial velocity in wavy thin films flow

H. Soumerai — 303 On the application of an "entropy maximizing principle" in flow regime predictions

C. Normand — 313 Pattern selection in salt fingers

H.-T. Lin and L.-K. Lin — 323 Heat transfer from a rotating cone or disk to fluids of any Prandtl number

M.P. Tolaba and R.J. Aguerre — 333 Unidimensional formulation of Fick's second law for prismatic bodies

Z.A. Mielczarek and T.J. Trojanowski — 341 Refrigerant vapour superheat in direct-expansion air cooling coils

M. Abdulhadi — 347 Estimation of air traces in steam-air mixtures subjected to dropwise condensation

B.S. Baclic — 353 Least square correction for radiation mean beam length

Announcement — 357 19th ICHMT International Symposium

EDITORIAL — I Software Survey Section

1987 Volume 14, Number 4 July-August

Contents

| | | |
|---|---|---|
| O.N. Cavatorta and R.D. Tonini | 359 | Dimensionless velocity profiles and parameter maps for non-Newtonian fluids |
| M.-J. Huang and C.-K. Chen | 371 | Conjugate forced convection-conduction plate fin in power law fluids |
| H.K. Yoon and A.J. Ghajar | 381 | A note on the Powell-Eyring fluid model |
| J.E. Gatica, H. Viljoen and V. Hlavacek | 391 | Stability analysis of chemical reaction and free convection in porous media |
| J.Y. Jang and W.J. Chang | 405 | Vortex instability of inclined buoyant layer in porous media saturated with cold water |
| R.K. Chohan | 417 | Thermal response of composite cylinders |
| S.-K. Park and K.-S. Chang | 429 | Pattern of interactive natural convection from two horizontal square cylinders |
| S. Chellaiah and R. Viskanta | 437 | Freezing of water and water-salt solutions around aluminum spheres |
| M.A. Azouni | 447 | Evolution of non-linear flow structure with aspect ratio |
| A.M. Abdallah | 457 | Heat exchange between a stagnant fluid and a continuously moving surface of variable temperature and velocity |
| R. Pasquetti and J.F. Durastanti | 467 | Modelisation des reseaux de transfert de chaleur a collecteurs bitubulaires et fluide caloporteur incompressible |
| N.N. Barthakur | 477 | Heat transfer studies of leaves by microwave radiation |
| N.A. Azhishchev and V.I. Bykov | 487 | A model of porous catalyst grain operating in transient conditions |
| | 493 | Announcement |
| EDITORIAL | I | Software Survey Section |

1987 Volume 14, Number 5 September-October

Contents

M. Vedha-Nayagam, P. Jain and G. Fairweather — 495 The effect of surface mass transfer on buoyancy-induced flow in a variable-porosity medium adjacent to a horizontal heated plate

M. Kazmierczak, D. Poulikakos and D. Sadowski — 507 Melting of a vertical plate in porous medium controlled by forced convection of a dissimilar fluid

P. Perre — 519 Measurements of softwoods' permeability to air: importance upon the drying model

K.C. Kim, M.K. Chung and Y. Kim — 531 Turbulent convective heat transfer around a normal fence in a two-dimensional duct

M.-C. Chyu — 543 On the boundary condition and data reduction of heat transfer experiment

A. Campo and U. Lacoa — 551 The simplest approach to forced convection in horizontal pipes exposed to natural convection and thermal radiation

M. Rubin, D. Arasteh and J. Hartmann — 561 A correlation between normal and hemispherical emissivity of low-emmissivity coatings on glass

V. Arp and J.M. Persichetti — 567 Thermally induced flow in a confined fluid. I. Theoretical concepts

M. Founoune, J. Aubreton and M.A. Dudeck — 577 Concentrations in a rarefied argon jet

A. Pantokratoras — 589 Numerical computation of a round laminar plume in a stratified environment

D.R. Otis — 597 Convection as the dominant mechanism of core stratification during transient natural convection in enclosures at high Rayleigh numbers

Announcement — 605 First World Conference on Experimental Heat Transfer, Fluid Mechanics and Thermodynamics

1987 Volume 14, Number 6 November-December

Contents

S. Chellaiah and R. Viskanta — 607 Natural convection flow visualization in porous media

M. Wang and A. Bejan — 617 Heat transfer correlation for Benard convection in a fluid saturated porous layer

T.W. Tong, W.-Q. Lin and R.E. Peck — 627 Radiative heat transfer in porous media with spatially-dependent heat generation

R. Vasantha, G. Nath and I. Pop — 639 Forced convection along a longitudinal cylinder embedded in a saturated porous medium

S.W. Churchill and M.A. Brown — 647 Thermoacoustic convection and the hyperbolic equation of conduction

H.M. Joshi — 657 Fully developed natural convection in an isothermal vertical annular duct

R.C. Prasad — 665 Analytical solution for a double-pipe heat exchanger with non-adiabatic condition at the outer surface

J.E. Gatica, H.J. Viljoen and V. Hlavacek — 673 Thermal instability of nonlinearly stratified fluids

J.M. Persichetti, W.G. Steward and V. Arp — 687 Thermally induced convection in narrow channels. II. Experimental results for refrigerant 113

W.M. Yan and T.F. Lin — 699 Unsteady conjugated heat transfer in laminar pipe flows with step change in ambient temperature

K.O. Pasamehmetoglu and R.A. Nelson — 709 The effect of Helmholtz instability on the macro-layer thickness in vapor mushroom region of nucleate pool boiling

J. Grifoll, X. Farriol and F. Giralt — 721 Eddy diffusivity equation for high Schmidt number mass transfer at regular rough surfaces

O.O. Ajayi — 731 Thermally induced flow in a hemispheroidal region

G. Ryskin — 741 Heat or mass transfer from a moving drop — some approximate relations for the Nusselt number

Announcement — 751 The First International Symposium on Symbolic Computation in Heat Transfer and Fluid Mechanics

753 LIST ON CONTENTS FOR VOLUME 14, 1987

759 AUTHOR INDEX TO VOLUME 14, 1987
